Description of the features:

O2 Modulation: O2 sensors signal management (reading and modulation);

Injection: digital multipoint injection timing management

Self adaptative injection: Auto-adaptive feature for dynamic injection map adjustments based on the stock O2 sensor signal;

eight injectors: Managing all 8 signals coming from the injectors to reach an optimal adjustment of A/F ratio;

two O2: two O2 sensor manage - for the twin engine it has the self-adjusting for each cylinder;

gearbox reading: Reading the sensor gear position signal;

speed limiter: Modifying the gear position setting to stop the activation of speed limiter;

rpm limiter: All injectors signal management to extend flow rate over the stock limiter;

Engine brake: Engine brake management (while decelerating) - for RB EVO once the YouTune accessory is connected

Ignition timing: spark advance dynamic management

Traction Control: Rapid Bike Traction Control system once the YouTune accessory is connected

Launch Control: Rapid Bike Launch Control system available once the YouTune accessory is connected

Shift assist (up): Managing engine cut-off for quick-shifting once the optional sensor is connected (SWGEAR or SW-PB);

Shift rod type: Shifting rod type specification for stock rear sets;

Shift Assist (up/down): K27-BLIP-xxx: managing engine with both power cut-off and blip for UP/DOWN gear shift
